

foretrex

101

The economical Foretrex™ 101 is the wrist-mount GPS that frees up your hands so you can focus on your outdoor activities. This product joins the Foretrex 201 in Garmin's growing line of wearable, wrist navigation devices. The Foretrex 101 has all the features and functionality of the Foretrex 201, including PC interface capabilities for downloading waypoints, tracks and routes, but operates on two AAA batteries.

Its easy-to-use interface and basic GPS capabilities are perfect for outdoor enthusiasts who would rather replace the batteries than recharge the unit in the field. This unit features Garmin's intuitive operating logic, utilizing six dedicated buttons to simplify navigation. Whether it's a campsite, or other place of interest, users can mark its location, identify the waypoint, and navigate to it later using the 'GoTo' function. Also, with the help of Garmin's exclusive TracBack technology, users can retrace their steps by following an electronic breadcrumb trail back to their original starting point.

Because the unit is waterproof, the Foretrex 101 is a natural companion on watersport adventures like kayaking, canoeing, boating and sailing. In fact, this device incorporates another feature found on the Foretrex 201: a sailboat-racing timer. Competitors can configure the countdown sequence prior to the start of the race and utilize their GPS location to be in the best possible tacking position when the race begins.

201

The Foretrex™ 201 is a wearable personal navigator, perfect for outdoor and marine enthusiasts who desire hands-free GPS navigation in a lightweight, affordable package. At a mere 78 grams, this waterproof wonder is lighter than most watches, and its wrist-top mount frees up hands for outdoor activities. Sporting an ergonomic wristband, the Foretrex 201 is similar in design to the Forerunner 201, yet is chocked full of GPS navigation features found in Garmin's popular Geko™ 201 unit.

With a user-friendly interface, the rugged Foretrex 201 simplifies navigation, making it ideal for the back country or water. Its six dedicated buttons (GoTo, Page, Enter/Mark, Up, Down and Power) make it easy to operate. It offers the most essential navigation data — enhanced GPS accuracy, extensive storage for waypoints, and reversible routes and tracks — on an easy-to-read display. Don't worry about packing extra batteries, because the Foretrex 201 runs on an internal lithium battery for 15 hours (typical use). Simply recharge and go.

The Foretrex 201 also comes equipped with special features sure to please mariners and hikers alike. It includes a unique application for sailing and paragliding racers that allows them to configure the start sequence of a race. The countdown is displayed in a large-number format that audibly alerts the user at each phase of the start sequence. With the help of Garmin's exclusive TracBack® technology, hikers can mark a campsite, go trekking all day, and follow the electronic 'breadcrumb trail' back to camp in time for dinner.

g e k o

Slim, lightweight and so simple to use - you'll want a Geko™ along on every outdoor adventure! These rugged waterproof GPS receivers weigh in at just over 88 g. The Geko 101 is a basic navigator that lets you mark locations and navigate to points. It's suited for even

the youngest adventure enthusiast. The 201 adds more options for storing waypoints, routes and tracks. When it's time for fun, check out the 201's built in GPS games, which are played outdoors with you as the main game feature. Geko - get it to go.

101

201

301

With its sun-yellow case, the economical Geko™ 101 is perfect for navigational novices. Features such as one-touch waypoint marking make it a snap to use. Easily maneuver from one waypoint to the next using its 250 waypoint storage capacity with symbols, and pan along your track with PanTrack.

- 250 Waypoints with names and icons
- Easy operation with five buttons for one hand use
- 3,000 trackpoints (101)
- 25 map datums
- GPS accuracy: 15 metres, 95% typical
- Built-in patch antenna
- Weight: only 88 g with batteries
- Compact size: 48 x 99 x 24 mm
- High-contrast display: 64 x 100 pixels
- 2 AAA batteries (not included)
- Waterproof to IEC529 IPX7 standards

With its distinctive canopy-green case, the powerful Geko™ 201 allows more waypoint and route storage, as well as available PC and external power connectivity. In addition, the Geko 201 boasts a user-configurable trip computer, 10,000 trackpoints, a new upcoming-turn feature, as well as PanTrack and TracBack. Also includes 4 fun, interactive games.

- Up to 12 hours battery life
- Easy five buttons for one-hand use
- PC connectivity and external power
- 10,000 trackpoints
- PanTrack and TracBack

The Geko™ 301 packs an amazing amount of functions into its slim frame. It has all the features of the Geko 201, plus an electronic compass and a barometric altimeter. The compass provides bearing information while you're standing still, and the altimeter determines your precise altitude and provides a 12 hour pressure-trend tool for gauging changing weather conditions. The Geko 301 also includes five interactive games that transform the great outdoors into a virtual board game, including the new Gekoids, which takes advantage of the electronic compass.

- Built-in electronic compass
- Barometric altimeter for elevation and weather pressure measurement
- Weighs only 88 g (with batteries)
- 500/20 waypoint/route storage
- 10,000 trackpoints and 10 saved tracks available

eTrex

Come hill or high water, with an eTrex® GPS by your side, you can go beyond your limits without looking back! Wherever you spend your spare time, we have a compact, go-anywhere GPS receiver to suit your escapades, from

basic requirements to the ultimate in navigational tools. They are waterproof, lightweight, low-cost and easy to use, plus with the choice of MapSource capabilities, you can discover the possibilities and get out of your comfort zone!

The eTrex® provides satellite navigation you can count on, pure and simple. A 12-channel GPS locks onto satellites fast and stays locked on, even under extreme conditions. A built-in antenna allows this sleek unit to slip into your hand, pack or pocket with ease. Operations are equally easy and logical. The eTrex is proof that GPS doesn't have to be difficult.

- ▶ 22 Hours battery life
- ▶ Transferable waypoints, routes and tracks between PC and GPS.
- ▶ 1536 Track Points

With eTrex® Camo from Garmin by your side, you can get involved in the thrill of the hunt without looking back. Because when it's time to return to your vehicle or find a tree stand, eTrex Camo will take you there. The eTrex Camo includes a built-in database which recommends the best times to Hunt and Fish at any given waypoint. And thanks to its camouflage casing, you can keep eTrex Camo by your side without giving away your location.

- ▶ 22 Hours battery life
- ▶ Transferable waypoints, routes and tracks between PC and GPS.
- ▶ 2000 Track Points

Wherever your adventures take you, this compact GPS with high resolution screen is ready to go. eTrex® Venture is just the thing for hiking, camping and fishing. The Venture has a built-in worldwide city point database, and it comes with a PC cable to download waypoints and routes from MapSource® CD-ROMs. The innovative four-way cursor allows for smooth map panning. Just select your destination, and eTrex® Venture will guide you there.

- ▶ 20 Hours battery life
- ▶ City point database
- ▶ Transferable waypoints, routes and tracks between PC and GPS.
- ▶ 2048 Track Points

eTrex® Legend is one of the smallest GPS units you'll find with built-in motorway and road detail. This versatile navigator is at home on you dash or in your hand as you hike new trails. The Legend accepts downloaded map data from MapSource, including business and residential streets and points of interest such as restaurants, lodging and attractions. It even comes with a PC cable for downloading street level details.

- ▶ 18 Hours battery life
- ▶ Transferable waypoints, routes and tracks between PC and GPS.
- ▶ Accepts 8 MB downloadable MapSource CD data
- ▶ 10000 Track Points

eTrex® Summit has features not found on your typical GPS. Its barometric altimeter provides accurate elevation reporting and records elevation profiles so you can track your total ascent over distance and time. The electronic compass displays direction even when you're not moving. eTrex Summit is tops with hikers, climbers, hunters and anyone who wants the best little GPS plus a whole lot more.

- ▶ 16 Hours battery life
- ▶ Transferable waypoints, routes and tracks between PC and GPS
- ▶ Electronic compass
- ▶ Barometric altimeter
- ▶ 3000 Track Points

It's the ultimate navigational tool with a high resolution display. eTrex® Vista has enough map detail to help you get out of town, an electronic compass to keep you on course, and a barometric altimeter to record the details of your trek. This GPS is designed for serious hikers and climbers who want the best in navigation on and off the trail. The Vista comes with a PC cable to download street level detailed maps.

- ▶ 12 Hours battery life
- ▶ Transferable waypoints, routes and tracks between PC and GPS
- ▶ Accepts 24 MB downloadable of MapSource® CD data
- ▶ 10000 Track Points

The eTrex® Legend C is Garmin's exciting, new, pocket-sized handheld that brings colour, automatic routing, longer battery life, plus more to our popular-selling eTrex Legend. You won't miss a thing when you take this colourful, lightweight, easy-to-use handheld out hiking, biking, boating or even geocaching. The eTrex Legend C along with the eTrex Vista C are Garmin's smallest, least expensive products to combine a colour TFT display and advanced GPS routing capabilities in a waterproof design.

- ▶ 36 Hours battery life
- ▶ Sunlight viewable 256 colour display
- ▶ 24 MB Internal memory
- ▶ Trip and Waypoint Manager software and cable included

The eTrex® Vista C is Garmin's exciting, new, pocket-sized handheld that brings colour, automatic routing, longer battery life, plus more to our popular-selling eTrex Vista. You won't miss a thing when you take this colourful, lightweight, easy-to-use handheld out hiking, biking, boating or even geocaching. The Vista C has all the features of the Legend C with the addition of a barometric altimeter and electronic compass.

- ▶ 20 Hours battery life
- ▶ Trip and Waypoint Manager software and cable included
- ▶ Electronic compass
- ▶ Barometric altimeter
- ▶ Sunlight viewable 256 colour display

GPS 72

You'd never know by the low price, but the GPS 72 has a lot going for it. Large greyscale display with user-configurable data fields. Simple operations. What's more, this sturdy handheld is completely submersible and yes, it even floats. The GPS 72 from Garmin. Big display, easy to use, exceptional accuracy.

- ▶ 16 Hours battery life
- ▶ Preloaded with worldwide cities and marine database with nav aids, buoys and lights.
- ▶ Large high-contrast 4-level grey scale display (120 x 160 pixels)
- ▶ 2048 Track Points

GPS 76

This sturdy handheld is right at home on land or sea. It is tough on the outside, waterproof and yes, it even floats. You will always know where you are and where you're going. Features a built-in quadrifilar antenna for superior reception. View your location on a large, sharp, four-level greyscale screen for excellent separation and contrast.

- ▶ 16 Hours battery life
- ▶ Marine database preloaded with worldwide cities and nav aids
- ▶ External antenna option
- ▶ 2048 Track Points

GPSMAP 76

Whether you choose the basic navigation features of the GPS 76 or the detailed mapping capabilities of the GPSMAP 76, you will always know where you are and where you're going. It features built-in quadrifilar antenna for superior reception. View your location on a large, sharp, four-level greyscale screen for excellent separation and contrast.

- ▶ 16 Hours battery life
- ▶ Accepts up to 8 MB of downloaded MapSource® and BlueChart® cartography data
- ▶ Basemap with cities, motorways and major roads.
- ▶ External antenna option
- ▶ 10000 Track Points

GPSMAP 76S

Features all the capabilities of the GPSMAP 76 plus additional 'sensors'. This incorporates a GPS receiver, barometric altimeter, and an electronic compass that delivers precise location, elevation and bearing information to take your adventures as high or as far as you want to go! Increased readability, bigger buttons and a rugged design to make you at home in even the harshest of conditions!

- ▶ 10 Hours battery life
- ▶ Accepts up to 24 MB of downloaded MapSource® and BlueChart® cartography data
- ▶ Electronic compass
- ▶ Barometric altimeter

GPSMAP 60C

With a new rugged case design, the GPSMAP 60C introduces many exciting features including new TFT 256 colour display technology, producing one of the brightest, sunlight-readable displays available. With separate serial and USB interfaces. Detailed maps may be transferred to the unit using the USB interface. Navigation instructions can be shared with repeaters, plotters and autopilots using NMEA protocols through the dedicated serial port. The GPSMAP 60C also includes a built-in International basemap with auto-routing capabilities. Completely waterproof with battery life exceeding 25 hours, this new product is targeted to the marine and outdoor recreation markets. The GPSMAP 60C is fully compatible with MapSource® products like BlueChart® and City Navigator® providing detailed streets for turn-by-turn guidance.

- ▶ Tidal data from BlueChart CD available
- ▶ 30 Hours battery life
- ▶ Sunlight viewable 256 colour display
- ▶ 56MB Internal memory
- ▶ Trip and Waypoint Manager software, cable included
- ▶ Belt clip

GPSMAP 60CS

The GPSMAP 60CS features all the capabilities of the GPSMAP 60C plus additional 'sensors'. This incorporates a barometric altimeter and an electronic compass that delivers precise location, elevation and bearing information to take your adventures as high or as far as you want to go!

- ▶ 20 Hours battery life
- ▶ Sunlight viewable 256 colour display
- ▶ 56 MB Internal memory
- ▶ Electronic compass
- ▶ Barometric altimeter
- ▶ Trip and Waypoint Manager software and cable included
- ▶ Belt clip

GPSMAP 76C

The GPSMAP 76C is a new update to the GPSMAP 76 family of handheld products. The GPSMAP 76C offers all the existing features found in the GPSMAP 76 such as the internal quad helix antenna, fully waterproof to IPX 7, it floats, has large easy to access buttons, uses 2 AA batteries, an international basemap that provides general coastline detail while also showing major roads and cities, is BlueChart® compatible and it all fits in the same size case. What is different is that the GPSMAP 76C offers a sunlight viewable 256 colour display. It also comes with a huge 115 MB downloadable memory. And to ensure fast data loading, the GPSMAP 76C now offers USB compatibility while still offering the standard NMEA interface capability for normal marine interfaces. The GPSMAP 76C also offers turn by turn routing on the basemap, or the unit can take MapSource® City Navigator® data for full street level detail and address and point of interest look up capability.

- ▶ Pacific routable basemap
- ▶ Sunlight viewable 256 colour display
- ▶ Tidal data from BlueChart® CD available
- ▶ 30 Hours battery life
- ▶ 115 MB downloadable memory for marine cartography and also street level details
- ▶ Trip and Waypoint Manager software, cable included

GPSMAP 76CS

Features all the capabilities of the GPSMAP 76C plus additional 'sensors'. This incorporates a GPS receiver, barometric altimeter, and an electronic compass that delivers precise location, elevation and bearing information to take your adventures as high or as far as you want to go! Increased readability, bigger buttons and a rugged design to make you at home in even the harshest of conditions!

- ▶ 20 Hours battery life
- ▶ Pacific routable basemap that provides general coastline detail while also showing major roads and cities
- ▶ Sunlight viewable 256 colour display
- ▶ 115 MB downloadable memory for marine cartography and also street level details
- ▶ Electronic compass
- ▶ Barometric altimeter
